SAN GABRIEL VALLEY CLEANUP PROGRAM – PHAOSTRON FACILITY AT 717  
NORTH CONEY AVE., AZUSA, CA (FILE NO. 108.0678)

Dear Mr. McGuirk:

In a letter dated March 24, 1999, Regional Board staff commented on risk assessment reports submitted to us by your consultant, Dames & Moore.

Based on our disagreements regarding the site assessment reports, and the need for soil cleanup at the site, you are hereby requested to submit a soils remedial action plan (RAP). Two copies of the RAP should be submitted to our office by June 8, 1999. Failure to submit the RAP will result in appropriate enforcement action.

In addition, the analytical report for the second round of sampling for newly detected chemicals (perchlorate, MTBE, NDMA, and 1,4 dioxane) is overdue. The due date was March 30, 1999. Although the validity of the data from your groundwater monitoring well is questionable because of its design, you still need to submit the analytical report by the new due date of May 30, 1999 to help verify your first round of sampling data.

If you have any questions concerning these matters, please call me at (213) 576-6727.

Sincerely,

E. G. SOLOMON  
Associate Engineering Geologist
